Foreign Policy and the Kennedy Administration

John F. Kennedy left an uncertain legacy in the area of foreign policy. Kennedy took office committed to pursuing the cold war more vigorously, and during his first year he launched a major military buildup, enlarged U.S. foreign aid programs, and undertook new foreign policy commitments in various parts of the world. The Kennedy offensive dramatically worsened relations with the Union of Soviet Socialist Republics (USSR), contributing to the Cuban Missile Crisis of October 1962. In the aftermath of that most frightening confrontation of the cold war, Kennedy seemed to shift from the militant approach that had marked his early years in office, taking the first hesitant steps toward what would later be called détente. It can never be known how far Kennedy might have gone in this direction had his administration not been cut short by an assassin’s bullet. In other areas, moreover, he enjoyed less success in foreign policy, and in places like Vietnam and Latin America, his record and legacy is even more mixed and ambiguous.

To meet the challenges of the new era, Kennedy revamped the machinery of U.S. foreign policy. Contemptuous of the State Department, he reportedly fantasized about establishing under his personal control a small, secret office to run U.S. foreign policy. He contented himself with remodeling the National Security Council (NSC) to enhance his personal control. As his special assistant for national security affairs, he chose McGeorge Bundy, formerly a Harvard dean. Bundy and his deputy, Walt Whitman Rostow, eliminated Eisenhower’s cumbersome committee system, making the NSC a compact body of eleven people. The White House established its own situation room and installed equipment giving it direct access to State Department, Defense Department, and Central Intelligence Agency (CIA) cables. Although it comprised a “little State Department,” thus posing a threat to its larger and older rival, the NSC under Bundy’s direction maintained effective liaison with the State Department bureaucracy. Bundy managed the flow of information, intelligence, and decision papers to the president and monitored the operations of other agencies. Rather than simply acting as a neutral clearinghouse, the NSC also lobbied for policies it preferred. It remained throughout the Kennedy years the president’s major foreign policy instrument.

With the White House leading the way, the Kennedy administration launched a full-scale effort to meet the challenges of the cold war. Kennedy ordered a massive buildup of nuclear weapons and long-range missiles to establish a credible deterrent to Soviet nuclear power. Persuaded that Eisenhower’s reliance on nuclear weapons had left the United States muscle-bound in many situations, he also expanded and modernized the nation’s conventional military forces to permit a “flexible response” to various types and levels of threats. Certain that the emerging nations of the Third World would be the principal battleground of the Soviet-American rivalry, the administration devoted much attention to developing an effective response to guerrilla warfare. Kennedy and his advisers also felt that the United States must strike at the source of the disease, however, and they placed great emphasis on devising programs of economic and technical assistance that would eliminate the conditions in which communism flourished and channel revolutionary forces into democratic paths.

National Security Files

Researchers can study all aspects of Kennedy administration foreign policy through the Country Files of the National Security File, 1961–1963. As the title suggests, the files were maintained in the White House by the staff of National Security Adviser McGeorge Bundy. They were organized geographically and composed separate files for individual countries. Arranged chronologically, the files include many different types of material: extensive cable traffic between the departments and agencies in Washington and the embassies and missions abroad; memoranda of conversations between U.S. and foreign officials and among top U.S.
officials; intelligence reports assessing foreign policy issues; internal memoranda, including memos from the national security adviser to the president; and agendas for and records of top-level meetings. The Country Files provide a clear sense of the way in which the administration perceived major foreign policy issues and framed its responses. The chronological arrangement permits the researcher to follow on a day-to-day basis the administration’s handling of crises and to trace the evolution of major policies.

This edition of National Security Files contains three sections: General, Cables, and Subjects. The General section, Reels 1–2, lives up to its organizational name in that it covers general developments in U.S.-Cuba and U.S.-USSR relations, and policy options of all three countries. Substantive issues are covered in the Subjects section. The Cables section, Reels 2–7, chronicles international relations regarding Cuba through an extensive volume of diplomatic cables. The cables document general issues in U.S.-Cuba, U.S.-USSR, and Cuba-USSR relations, and include day-to-day reporting on interactions and policy regarding Cuba. The Cuban Missile Crisis features prominently in the day-to-day reporting in this section. Reels 7–21 compose the Subject files for Cuba. This section highlights an extensive array of subjects in U.S.-Cuba relations and includes a large number of CIA and other intelligence reports that assess issues such as Cuban exile activity, Castro’s activities in Latin America, Cuban and Soviet military postures, trade with Cuba, and the Cuban Missile Crisis.

No region of the world occupied more of the Kennedy administration’s attention than Latin America. Committed to promoting moderate change in a region swept by revolutionary ferment, the administration developed a bold new program of economic assistance, the Alliance for Progress. The administration also took vigorous steps to head off leftist revolutions and developed a near obsession with Castro’s Cuba. Yet all the effort produced at best modest results. Castro remained in power, and the administration’s no-invasion pledge following the Cuban Missile Crisis confirmed his position. The Alliance for Progress registered only mild gains, and a region once bright with hope continued to simmer with frustration.

Cuba proved to be a special fixation of the Kennedy administration. Kennedy inherited from Eisenhower a poorly conceived plan to overthrow the Cuban regime of Fidel Castro. Although dubious about the morality and workability of the plan, the new president was eager for a foreign policy victory, and he hesitated to scrap it for fear critics would charge him with weakness. Without the air support he refused to provide, however, the plan was doomed to failure, and although Kennedy assumed responsibility for the debacle at the Bay of Pigs in April 1961, his fledgling administration was vulnerable to attack from those who thought the U.S. had done too little and those who thought it had done too much.

A steady increase of tensions between the U.S. and USSR led directly to the Cuban Missile Crisis of 1962. Upon taking office, the Kennedy administration learned that a “missile gap” presumed to be in favor of the USSR actually favored the United States. Determined to build on and exploit that lead, Kennedy significantly expanded the U.S.’s already formidable nuclear arsenal, and in October 1961, Deputy Secretary of Defense Roswell Gilpatric proclaimed to the world that the U.S. was invulnerable to a Soviet sneak attack and had a second-strike capability as extensive as the Soviet capability for a first strike. Any move on the Soviet part would therefore be an act of “self-destruction.” Khrushchev appears to have responded to the U.S. challenge with a daring and risky gambit in Cuba.

Khrushchev’s actions provoked the most dangerous Soviet-American confrontation in the history of the cold war. Kennedy responded by “quarantining” Cuba, sealing off the island with a naval blockade and demanding that the Soviets withdraw their missiles. While the world nervously awaited the Soviet response, tensions mounted. Neither side had total control of its forces in the area, and on several occasions incidents in or around Cuba threatened to trigger a war. Eventually, Khrushchev relented, agreeing to withdraw the missiles in return for a face-saving U.S. pledge not to invade Cuba. The U.S. accepted the deal and privately assured Moscow that it would remove its own Jupiter missiles from Turkey. The superpowers pulled back from the brink, and the world breathed a collective sigh of relief.

This edition of the John F. Kennedy National Security Files offers a close look at the evolution of U.S. policy toward Communist Cuba. With this material, researchers can examine the troubled U.S. relations with Castro’s Cuba and the intricacies of Castro’s foreign policy. Castro’s aim was to find new sources of trade, aid, and foreign investment, but his support of guerrilla movements typified the nation’s involvement in
regional Latin American politics. In these pages of recently declassified diplomatic analysis, reporting, intelligence, and correspondence, scholars will learn firsthand of Castro’s alliance with the USSR, and its dramatic implications through the Cuban Missile Crisis, and his efforts to spread communism through Cuba-backed guerilla insurgencies throughout Latin America.

SOURCE NOTE

The documents reproduced in this publication are from the John F. Kennedy Presidential Papers, National Security Files, Countries, in the custody of the John F. Kennedy Library, Boston, Massachusetts.

EDITORIAL NOTE

LexisNexis has filmed, in their entirety, all NSF Country Files documents that were declassified, sanitized, or unclassified. Many individual documents and entire folders of documents remain classified or unprocessed; LexisNexis has therefore included in this publication the “Document Withdrawal Sheets” for each folder. These withdrawal sheets itemize documents that have been withdrawn from the folder, due to either national security or privacy restrictions, by the staff of the Kennedy Library. Portions of the Scope and Content Note have been adapted from introductions by series General Editor George C. Herring.

## PRINCIPAL CORRESPONDENTS INDEX

The following index is a guide to the principal correspondents in this microform publication. The first number after each entry refers to the reel, while the four-digit number following the colon refers to the frame number at which the file containing correspondence by the person begins. Hence, 2: 0800 directs researchers to Frame 0800 of Reel 2. By referring to the Reel Index, which constitutes the initial segment of this guide, the researcher will find topics, within each category, listed in the order in which they appear on the film.

Papers from the President John F. Kennedy Assassination Records Collection
Part 1: Kennedy Administration Policy Toward Cuba

The Special Studies Series
ohn F. Kennedy left an uncertain legacy in the area of foreign policy. Kennedy took office committed to pursuing the cold war more vigorously, and during his first year he launched a major military buildup, enlarged U.S. foreign aid programs, and undertook new foreign policy commitments in various parts of the world. The Kennedy offensive dramatically worsened relations with the Soviet Union, contributing to the Cuban Missile Crisis of October 1962. In the aftermath of that most frightening confrontation of the cold war, Kennedy seemed to shift from the militant approach that had marked his early years in office, taking the first hesitant steps toward what would later be called détente. It can never be known how far Kennedy might have gone in this direction had his administration not been cut short by an assassin's bullet. In other areas, moreover, he enjoyed less success in foreign policy, and in places like Vietnam and Latin America, his record and legacy is even more mixed and ambiguous.

The John F. Kennedy National Security Files, 1961–1963, Latin America, First Supplement: Cuba offers a close look at the evolution of U.S. policy toward Communist Cuba. With this material, researchers can examine the troubled U.S. relations with Fidel Castro’s Cuba and the intricacies of Castro’s foreign policy. Castro’s aim was to find new sources of trade, aid, and foreign investment, but his support of guerrilla movements typified the nation’s involvement in regional Latin American politics. In these pages of recently declassified diplomatic analysis, reporting, intelligence, and correspondence, scholars will learn firsthand of Castro’s alliance with the Soviet Union, and its dramatic implications through the Cuban Missile Crisis, and his efforts to spread communism through Cuba-backed guerilla insurgencies throughout Latin America.

This edition of National Security Files contains three sections: General, Cables, and Subjects. The General section, Reels 1–2, lives up to its organizational name in that it covers general developments in U.S.-Cuba and U.S.-USSR relations, and policy options of all three countries. The Cables section, Reels 2–7, chronicles international relations regarding Cuba through an extensive volume of diplomatic cables. The cables document general issues in U.S.-Cuba, U.S.-USSR, and Cuba-USSR relations, and include day-to-day reporting on interactions and policy regarding Cuba. The Cuban Missile Crisis features prominently in the day-to-day reporting in this section. Reels 7–21 compose the Subject files for Cuba. This section highlights an extensive array of subjects in U.S.-Cuba relations and includes a large number of CIA and other intelligence reports that assess issues such as Cuban exile activity, Castro’s activities in Latin America, Cuban and Soviet military postures, trade with Cuba, and the Cuban Missile Crisis.
