BLACK STUDIES

HISTORY VAULT: Civil Rights and the Black Freedom Struggle in the 20th Century

ProQuest History Vault’s coverage offers the opportunity to study the most well-known and unheralded events of the Black Freedom Struggle in the 20th century from the perspective of the men, women and even children who waged one of the most inspiring social movements in American history. This category consists of the NAACP Papers and Federal Government Records, Organizational Records and Personal Papers regarding the Black Freedom Struggle in the 20th Century. Taken together, these ten modules offer an extremely strong combination of resources on the civil rights movement with major collections of records from the NAACP, Southern Christian Leadership Conference (SCLC), Student Nonviolent Coordinating Committee (SNCC) and Congress of Racial Equality (CORE).

HISTORY VAULT: NAACP Papers

The NAACP Papers collection consists of six modules containing internal memos, legal briefings and detailed activity summaries from national, legal and branch offices throughout the country. With a timeline that runs from 1909 to 1972, NAACP Papers documents the realities of segregation in the early 20th century to the triumphs of the passage of the Civil Rights Act of 1964 and the Voting Rights Act of 1965 and beyond. The files provide a comprehensive view of the NAACP’s evolution, policies and achievements during this era.

“An essential acquisition for libraries serving scholars in civil and human rights American history, criminal justice, social choice and political theory, military history, and sociology. A tremendously significant historical resource.”

— Cheryl LaGuardia, Library Journal review of NAACP Papers

Another prominent subject is the fair administration of the election process. Troubles often arose as African Americans prepared to exercise their newly won rights to vote and run for office; many letters in call for military intervention to secure these rights.

Black Historical Newspapers
Black newspapers were on the frontlines of the civil rights movement. Organizing boycotts and nationwide protests, fighting discriminatory housing and employment practices, launching community clean-up campaigns, and advocating for improved health services for minorities, they gave voice and strength to communities often ignored by other media.

The largest archive of its kind, VHA preserves history as told by the people who lived it, offering insight rarely available in traditional content. The majority of testimonies contain a complete personal history of life before, during and after the interviewee’s firsthand experience.

“From the viewpoint of historians, the most important benefit of using testimonies is that they bring into history events that would otherwise remain completely unknown, since they are missing from conventional documentation in archives – most of which was written by perpetrators and organizers of genocide. Testimonies can save events from oblivion, but they can also provide very different perspectives of events known through conventional documentation.”

HISTORIC LITERARY CRITICISM

Historic Literary Criticism collects 20,000+ historical reviews, essays and commentary from the 17th to the early 20th century. The content comes from contemporary periodicals as well as published and unpublished letters; the cornerstone of the collection comes from the renowned Critical Heritage series from Routledge. These easy-to-search documents allow researchers at all levels, but particularly undergraduates, to place authors and texts into a full historical critical environment and investigate how contemporary critics assessed their works.

PATROLOGIA LATINA

Patrologia Latina covers the works of the Latin Fathers from Tertullian around 200 AD to the death of Pope Innocent III in 1216. In 221 volumes it covers most major and minor Latin authors, and contains the most influential works of late ancient and early medieval theology, philosophy, history and literature. The Patrologia Latina Database delivers the full text of the Patrologia Latina, including all prefatory material, original texts, critical apparatus, indexes and illustrations. This database has already made an enormous difference to the work of scholars of patristics (the study of the church fathers), theology, medieval history and Latin. In many other disciplines in the humanities, from philosophy and medieval languages to the history of art and the history of medicine, it is making a significant contribution to research.

ACTA SANCTORUM

The Acta Sanctorum are a principal source for research into the societies and cultures of early Christian and medieval Europe. Our knowledge of this period relies heavily on hagiographical literature, and specifically on this monumental collection of texts published over a period of 300 years. This database contains the complete texts of 68 printed volumes, from the two January volumes published in 1643 to the Propylaeum of December published in 1940. It was prepared with the help of the Societ des Bollandistes and includes the Bibliotheca Hagiographica Latina reference numbers, which are widely used by scholars to identify hagiographical texts. The source for the database is the original edition, published in Antwerp and Brussels, and not the later incomplete editions published in Venice in 1734-1760 and by Palme in Paris in 1863-1870.

Researchers will find inexhaustible information on every aspect of life from the beginning of the Christian era to the end of the 16th century, in critical editions with commentaries on the source documents that include Vitae, Passiones, Miracula, Translationes, Gloria posthuma, inscriptions and more.
