1.1.1 Non-text Content (Level A) Also applies to: EN 301 549 Criteria • 9.1.1.1 (Web) • 10.1.1.1 (Non-web document) • 11.1.1.1.1 (Open Functionality Software) • 11.1.1.1.2 (Closed Functionality Software) • 11.8.2 (Authoring Tool) • 12.1.2 (Product Docs) • 12.2.4 (Support Docs) Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Non-text content in the product has appropriate alt text where the image or non-text content is important to the understanding of the content. Primary source government documents are provided as scanned images in PDF format. Optical character recognition (OCR) makes most of this scanned historical content accessible to screen readers. However, some of the content, particularly scans of handwritten notes, maps, and other content that is not type set, cannot be accurately scanned by OCR technology. This content may be harder to read with a screen reader. **Exceptions:** • The product icon/logo in the header is missing alt text. It should have empty alt text as it is decorative. • On the homepage, buttons that scroll through decorative images are not given accessible labels. Since they only control display of decorative images, they should be hidden from screen readers. Conformance verified through WAVE plug-in in Chrome browser, NVDA screen reader, and visual inspection of code.
