ProQuest Nursing and Allied Health Source

Featuring credible non-traditional content for dynamic learning and practitioner use
ProQuest Nursing and Allied Health Source

This reliable and versatile database is invaluable for students in nursing and allied health training; academic researchers and teaching staff; registered nurses, care workers, healthcare assistants and support workers.

Offers broad nursing coverage consisting of leading full-text journals including Nurse Education in Practice, Association of Operating Room Nurses, AORN Journal and Journal of Nursing Scholarship alongside a wealth of non-periodical content:

- **Exclusive Medcom Nursing procedure video content**, split into short, easy-to-view clips, plus new videos from INTELECOM

  Patrick’s studies have taught him all about the process of nasogastric tube removal, but he’s at the hospital today and actually has to perform the procedure. A search in ProQuest pulls up a short video clip of the procedure. Patrick is confident and ready to care for the patient after quickly reviewing the video clip.

- **Cultural competency resources** covering more than 200 countries

  Sara is caring for a patient who has relocated to Spain from Russia. The patient has injured his ankle and has swelling, but refuses to allow Sara to put ice on the injury. Sara discovers reading a CultureGrams report in ProQuest that it is a common Russian belief that cold temperatures cause illness.
Carol Letner is a nurse researcher and professor teaching students on disease control and management in children. Carol wants her students to do a group project on meta-analysis on the subject. Using ProQuest, she is able to search and retrieve related full-text articles on disease control and management in children from pediatric nursing topic tree in the nursing study paths. Carol is able to provide her students with full-text articles for their group projects.

Roar is interested in increasing the presence of underrepresented minorities in healthcare professions in his hospital. His journal literature search for methods used successfully by other hospitals hasn’t been useful. Using ProQuest he finds a full-text dissertation representing emerging research on minority and ethnic groups as well as hospitals.

Sara is concerned about excessive sleepiness in an elderly patient but wants to brush up on the signs and symptoms. A search in ProQuest brings her to a reference ebook chapter all about evidence-based geriatric nursing protocols on her topic. After reading the chapter, Sara has a scale to quantify her patients’ symptoms and has refreshed her memory on the most primary sleep disorders in older adults.

Over 15,000 full-text dissertations with subject coverage ranging from nursing education, women’s studies, oncology, cardiology, nursing homes to public health.

Nursing reference e-books – chapters of key reference books from various providers, including John Wiley & Sons and Springer Publishing Company.

British Nursing Index
The British Nursing Index (BNI) is a bibliographic database that indexes the most popular English-language nursing journals published primarily in the U.K., as well as a selection of titles from the U.S. and Australia. The index currently includes more than 260 titles covering all aspects of nursing, midwifery and community healthcare from 1994 to the present.

BNI aims to be the premier database for the support of education, research, practice and development of nurses, midwives, health visitors and related staff. It achieves its aim through being the most current and most comprehensive in coverage of U.K. literature as well as providing access to the most important of other English literature.

Also available – British Nursing Index with Full Text – find out more on www.proquest.com/go/bni

Nursing ebooks from ebrary – a ProQuest business
ebrary helps customers acquire e-books strategically through a three-step approach: Transition, Diversify, and Streamline™.
