502.3.1 Object Information	Supports	<p>Attributes for role, state/s, boundary, name and other properties for all standard and custom user interface controls are programmatically determinable.</p> <p>Compliance of this standard was validated using screen readers (listed above) and developer tools.</p>

Criteria	Conformance Level	Remarks and Explanations
502.3.2 Modification of Object Information	Supports	<p>States and properties that can be set by the user are capable of being set programmatically, including through assistive technology. For example, users are able to change focus and expand and collapse panels using a keyboard only. The state of the object is announced through assistive technology.</p> <p>Compliance of this standard was validated using screen readers (listed above) and keyboard checks.</p>
502.3.3 Row, Column, and Headers	Partially Supports	<p>Data tables are not used as part of the application. As new content is added, data tables may be included with the content. While we encourage our publishing partners to supply properly marked up content, as a practice, we do not generally alter provided content at this level.</p> <p>This standard was evaluated using manual visual checks.</p>

Criteria	Conformance Level	Remarks and Explanations
502.3.4 Values	Supports	<p>The current values available for a user input control can be programmatically determined. For example, a screen reader will read out the values in a drop-down menu, checkbox options, and radio buttons.</p> <p>Compliance of this standard was validated using screen readers (listed above) and keyboard checks.</p>
502.3.5 Modification of Values	Supports	<p>Values that can be set by the user can be set programmatically, including through assistive technology.</p> <p>Compliance of this standard was validated using screen readers (listed above) and keyboard checks.</p>
502.3.6 Label Relationships	Supports	<p>All forms have been coded with the necessary mark-up (e.g., using labels / ids, fieldsets, etc.) to make them accessible to assistive technologies.</p> <p>Text labels identify all form fields. Label / ids and other accessible code necessary for screen readers are associated with all form elements.</p> <p>Compliance of this standard was validated using WAVE and manual visual checks.</p>

Criteria	Conformance Level	Remarks and Explanations
502.3.7 Hierarchical Relationships	Supports	<p>Hierarchical (parent-child) relationships are programmatically determinable. For example, when tabbing to a dropdown, assistive technology will announce how many items it contains.</p> <p>Compliance of this standard was validated using screen readers (listed above) and manual checks.</p>
502.3.8 Text	Supports	<p>Standard HTML code is used for displaying text on the screen used. Text styling is controlled through cascading style sheets.</p> <p>Compliance of this standard was validated using manual visual checks.</p>
502.3.9 Modification of Text	Supports	<p>The product is primarily static text; it does not allow users to set attributes of the text. Users are able to insert text into search fields and forms. This text can be modified using assistive technology.</p> <p>Compliance of this standard was validated using manual visual checks.</p>

Criteria	Conformance Level	Remarks and Explanations
502.3.10 List of Actions	Supports	<p>Where relevant, the product's UI components provide a list of actions programmatically determinable by assistive technologies.</p> <p>For example:</p> <ul style="list-style-type: none"> • When auto-suggest options are available in a search field, the assistive technology will notify the user and make it clear how to access the options. • In cases where the content is only available as image-based content, the product provides a feature to generate a text-only version. The AT notified the user of the feature and how to use it. <p>Compliance of this standard was validated using screen readers (listed above) and manual keyboard checks.</p>
502.3.11 Actions on Objects	Supports	<p>This product is coded in a way to allow assistive technologies (AT) to programmatically execute available actions on objects.</p> <p>Compliance of this standard was validated with using screen readers (listed above) and manual keyboard checks.</p>

Criteria	Conformance Level	Remarks and Explanations
502.3.12 Focus Cursor	Supports	<p>The current input focus can be discerned by assistive technology (using standard html code for forms, etc.).</p> <p>For most page elements, cursor focus is indicated visually by a gray border.</p> <p>This standard was evaluated using manual keyboard and visual checks.</p>
502.3.13 Modification of Focus Cursor	Supports	<p>Users are able to modify the location of focus (for user focusable controls), the text insertion point (caret) when a caret exists, and change selection attributes of objects (when text and items can be selected by the user).</p> <p>This standard was evaluated using manual keyboard and visual checks.</p>

Criteria	Conformance Level	Remarks and Explanations
502.3.14 Event Notification	Partially Supports	<p>This product is coded in a way to notify assistive technologies (AT) of events relevant to user interactions, including but not limited to changes in the component's state(s), value, name, description, or boundary.</p> <p>For example:</p> <ul style="list-style-type: none">• Users are notified when their search results have been filtered.• Users are notified of the state of an expanded or collapsed panel. <p>Exception: In a few cases, events are not communicated to the user. For example, in some cases, error messages are not announced to screen reader users. When search results are re-sorted, this event is not communicated to AT.</p> <p>This standard was evaluated using screen readers (listed above).</p>

502.4 Platform Accessibility Features	Partially Supports	<p>The product does not interfere with system features to:</p> <ul style="list-style-type: none">• Enable sequential entry of multiple (chorded) keystrokes (Section 9.3.3)• Provide adjustment of delay before key acceptance (Section 9.3.4)• Provide adjustment of same-key double-strike acceptance (Section 9.3.5)• Provide screen reader support. In addition, a text-to-speech feature is available on document pages. It is an optional feature that can be enabled in the customer's account. (Section 10.6.9) <p>When available, image captions are displayed. (Section 10.7.1)</p> <p>However:</p> <ul style="list-style-type: none">• Captions are typically not provided for video content in this product. (Section 10.6.7)• Synchronized audio equivalents are typically not provided for video content (Section 10.6.8) <p>This standard was evaluated using screen readers (listed above), manual keyboard checks, and manual visual checks.</p>
