Field codes may be used in searches entered on the Basic Search, Advanced Search and Command Line Search pages. The tools available for searching are Search Fields, Limit Options, Browse Fields, “Narrow Results By” Limiters and Look Up Citation. Each is listed separately below. Some data can be searched using more than one tool.

**LIMIT OPTIONS**

Limit options are quick and easy ways of searching certain common concepts. A check box is available for:

Documents with images

A short list of choices is available for:

Drug status

Date limiters are available in which you can select single dates or ranges for date of publication.

**BROWSE FIELDS**

You can browse the contents of certain fields by using Look Up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look Up lists are available in the fields drop-down only for:

Publication title, Subject

**“NARROW RESULTS BY” LIMITERS**

When results of a search are presented, the results display is accompanied by a list of “Narrow Results by” options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on the term to apply it to (“narrow”) your search results. “Narrow Results by” Limiters in Prous Science Daily Essentials include:

Publication date

**LOOK UP CITATION**

If you need to trace a particular bibliographic reference, use the Look Up Citation feature. Find a link to this towards the top left-hand corner of the Advanced Search page; click this and you will go to a form where you can enter any known details of the citation, including:

Document title, Author, Date

**Terms & Conditions**

In addition to the Dialog Standard Terms & Conditions, the following Provider terms and conditions also apply.
